

👤 Summary

Results-oriented IT and Delivery Professional with 15+ years of experience in Software Development, Project Management, Application Modernization, Cloud Delivery, and Enterprise Application Development. Currently serving as a Project Manager at Accenture, leading a team of 42 professionals across development, QA, DevOps, and support functions delivering large-scale custom software and web applications hosted on Microsoft Azure. Demonstrated success in managing end-to-end project delivery, stakeholder engagement, Agile execution, cloud transformation initiatives, and software engineering excellence. Strong expertise in Microsoft technologies, Azure cloud services, application architecture, team leadership, and enterprise solution delivery.

📊 Skills

🎓 Education

Sindhura College of Engineering & Technology
Bachelor of Technology (B.Tech) - Computer Science & Engineering
Jawaharlal Nehru Technological University (JNTU)

🧰 Experience

ACCENTURE SOLUTIONS PVT. LTD.
Project Manager / Application Development Team Lead

Aug 2015

- Lead and manage a cross-functional team of 42 members including developers, QA engineers, DevOps engineers, business analysts, and support teams.
- Deliver enterprise-scale custom software applications and web applications hosted on Microsoft Azure App Services.
- Manage project scope, timelines, resources, budgets, risks, dependencies, and delivery milestones.
- Collaborate with clients, business stakeholders, architects, and leadership teams to define project roadmaps and delivery strategies.
- Drive Agile/Scrum ceremonies including sprint planning, backlog grooming, reviews, and retrospectives.
- Oversee solution architecture, technical design reviews, code quality governance, and release management.
- Lead cloud migration and application modernization initiatives.
- Ensure compliance with security, quality, and organizational standards.
- Conduct performance reviews, mentoring programs, and career development activities for team members.
- Manage stakeholder communication and executive reporting.
- Implement DevOps and CI/CD best practices to improve release efficiency and delivery quality.

- Ensure successful delivery of multiple concurrent projects while maintaining high customer satisfaction.

PENA4 TECH SOLUTIONS PVT. LTD.

Application Programmer

Jun 2013 - Aug 2015

- Developed enterprise web applications using ASP.NET, C#, SQL Server, AJAX, and Telerik Controls.
- Designed reusable components and business modules.
- Developed stored procedures, views, and database objects.
- Participated in requirement analysis, development, testing, deployment, and support.
- Worked closely with clients and business users to deliver customized solutions.

Accomplishments

- Successfully delivered multiple enterprise applications on Azure Cloud platforms.
- Led modernization initiatives improving scalability, maintainability, and system performance.
- Managed complex software delivery programs with distributed teams and multiple stakeholders.
- Improved development efficiency through Agile delivery practices and DevOps implementation.
- Maintained strong delivery performance while managing large-scale project portfolios.
- Led the development of fare calculation and rating engine modules.
- Managed requirements gathering, effort estimation, resource planning, and delivery.
- Designed and developed secure RESTful APIs for external vendor integrations.
- Implemented authentication and authorization mechanisms.
- Ensured high code quality through reviews and extensive unit testing.
- Developed advanced analytics dashboards and reporting solutions.
- Built physician performance, productivity, and revenue management modules.
- Optimized database performance and reporting processes.
- Delivered operational and business intelligence reporting capabilities.
- Developed project management and case management modules.
- Implemented workflow automation for audit and recovery processes.
- Enhanced document tracking and operational management capabilities.
- Improved efficiency through process automation and streamlined workflows.

Certifications

- Microsoft Certified Professional (MCP)
- Microsoft .NET Framework 4.0 - Web Applications Development (70-515)
- AZ-900 certified

Projects

- Enterprise Transit Fare Management System (PRESTO / AFMS): Client: Metrolinx, Canada. Role: Project Lead. Technologies: C#, Web API, Entity Framework, SQL Server. Highlights: Led the development of fare calculation and rating engine modules. Managed requirements gathering, effort estimation, resource planning, and delivery. Designed and developed secure RESTful APIs for external vendor integrations. Implemented authentication and authorization mechanisms. Ensured high code quality through reviews and extensive unit testing.
- Healthcare Analytics & Workforce Management Platform: Client: HIM On Call. Role: Senior Developer. Technologies: ASP.NET, C#, SQL Server, Telerik Controls. Highlights: Developed advanced analytics dashboards and reporting solutions. Built physician performance, productivity, and revenue management modules. Optimized database performance and reporting processes. Delivered operational and business intelligence reporting capabilities.

- Audit Recovery & Case Management Platform (RAC): Role: Software Developer. Technologies: ASP.NET, C#, SQL Server. Highlights: Developed project management and case management modules. Implemented workflow automation for audit and recovery processes. Enhanced document tracking and operational management capabilities. Improved efficiency through process automation and streamlined workflows.
